

## Sechs Ausstellerstimmen

„Don't miss next generation environment monitoring solution Aranet! We offer wireless temperature and humidity monitoring solutions for variety of businesses. Simple to use systems are suitable for large industrial site applications as well as smaller compounds. Our solutions are on booth 5-147.“

Vizma Bramane, SAF Tehnika JSC.

„Wir haben über 25 Jahren Erfahrung für berührungslose kundenspezifische Messlösungen sowie Low-Cost-Serienanwendungen an rotierenden Teilen. MANNER bietet Lösungen unter schwierigsten Umgebungsbedingungen. Wir fangen an wo andere aufhören.“

Dr. Ernst Manner und Dr. Julia Manner, Manner Sensortelemetrie GmbH.

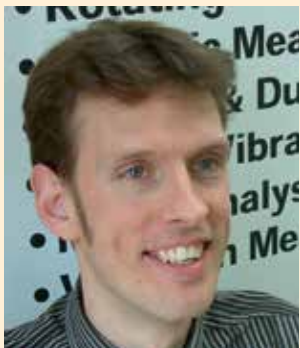

„Am Stand von Ondics sieht man, wohin die Reise geht: Das SIWIAT-IoT-Gateway für Industrie 4.0 ist leicht, verständlich und verfügbar. Und es löst praktische Probleme, für die bisher ein ganzer Technologiezoo nötig war: Messung, Überwachung, Alarmerung, Archivierung und mehr im Schaltschrank“

Wolfgang Clauss, Ondix GmbH.

„Andilog Technologies präsentiert seine neuesten kabellosen Kraft- und Drehmomentsensoren. Entdecken Sie die unterschiedlichen Anwendungsmöglichkeiten ohne störende Kabel und führen Sie benutzerfreundliche Versuche durch egal, ob im Labor, der Produktion oder unterwegs.“

Jean-Francois Bec, ANDILOG Technologies.

„Prosig are launching at the Sensor+Test 2017 the new DATS-easy measurement (DATS-em) system. DATS-em is a cost-effective hardware and software solution for data capture and analysis. DATS-em comprises a DATS-solo 4-channel, 24-bit data acquisition system and DATS-lite software.“

James Wren, Posic.

„Unsere neue Software-Plattform GI.bench kombiniert klare, einfache, präzise und leistungsstarke Werkzeuge auf einer digitalen Werkbank.. Mit der Plattform lassen sich Mess- und Prüfaufgaben konfigurieren, ausführen und analysieren. Zusammen mit der GI.cloud kann man von überall zugreifen.“

Annette C. Kehrer, Gantner Instruments GmbH

Was wird die  
Sensor+Test 2018
